

VEEKSHITH REDDY RAVULA

DATA ANALYST/BUSINESS ANALYST

+1 8607965102 ♦ Denton, Texas

[Gmail](#) ♦ [linkedin](#) ♦ [Github](#)

OBJECTIVE

Master's graduate in Advanced Data Analytics with experience in data analysis, machine learning, and business intelligence using Python, SQL, Tableau, Power BI, and cloud technologies. Skilled in predictive modeling, data visualization, and transforming complex datasets into actionable insights through end-to-end analytics solutions. Seeking Data Analyst, BI Analyst, or AI/Data-focused roles..

TECHNICAL SKILLS

Languages: Python, SQL, SAS

Analytics: Power BI, Tableau, Excel, Pandas, NumPy, EDA, Statistical Analysis

ML & AI: Scikit-learn, TensorFlow, PyTorch, NLP, Transformers, LLMs

Databases/Cloud: MySQL, Azure

Tools: Git, GitHub, Jupyter Notebook

EXPERIENCE

Health Data Analytics Consultant Intern, Optum Technology

April 2025 – May 2026

Remote

- Assisted in analyzing **healthcare claims**, operational, and enrollment datasets using **Python**, **SQL**, and **Excel** to support healthcare analytics and reporting initiatives.
- Performed data cleaning, preprocessing, exploratory data analysis (EDA), and trend analysis on structured healthcare datasets to identify patterns and improve reporting accuracy.
- Supported **ad-hoc analysis**, **data validation**, and quality checks for large healthcare datasets within data warehouse environments.
- Worked with SQL queries, **joins**, **aggregations**, and **data transformation** techniques to extract and prepare data for reporting and business insights.
- Collaborated with project teams to document analytical workflows, reporting logic, and data processing steps while following quality assurance standards.

Data Analyst Intern, Luxoft India

April 2023 – May 2024

Bangalore, India

- Gathered, integrated, and analyzed structured and unstructured enterprise data from multiple business applications, ITSM platforms, and operational databases to support IT Service Delivery analytics and reporting initiatives.
- Developed interactive dashboards, **KPI scorecards**, and analytical visualizations using **Power BI**, **SQL**, and **Excel**, enabling real-time monitoring of incident trends, service performance, SLA compliance, and operational metrics.
- Performed **exploratory data analysis (EDA)**, trend analysis, root cause analysis, and anomaly detection on high-volume datasets to identify recurring operational issues and support data-driven decision-making.
- Assisted in IT governance, observability, and service management reporting across incident, problem, and change management workflows in **cloud** and **on-prem enterprise** environments.
- Built automated ETL and reporting pipelines using **Python**, **Pandas**, **SQL**, and Excel automation techniques, reducing manual reporting effort and improving data accuracy and processing efficiency.

- Assisted in **developing, testing**, and maintaining software applications and backend components under senior developer guidance.
- Wrote **SQL queries** and supported **data extraction**, validation, and reporting activities using relational databases.
- Participated in **debugging**, troubleshooting, and resolving application issues to improve system performance and reliability.
- Supported **ETL workflows** and basic **data pipeline** development using Python and SQL.
- Worked in Agile environments and collaborated with cross-functional teams during development and testing activities.

PROJECTS

ETA change Prediction for American Airlines

Python, Random Forest, LSTM, Scikit-learn, TensorFlow

- Built machine learning models to predict post-departure ETA changes using 2.7M+ American Airlines operational records.
- Developed and compared Random Forest and LSTM models for time-series ETA prediction, achieving best performance with Random Forest (MAE: 6.33 minutes, 80.3% accuracy within ± 10 -minute threshold).
- Performed large-scale data preprocessing, feature engineering, weather-data integration, and chronological train/test validation.
- Identified departure variance and estimated departure delay as the strongest predictors of ETA volatility through feature importance analysis.

Interactive Sales Performance Dashboard

Tableau, Excel

- Designed an executive-facing Tableau dashboard analyzing 12+ months of sales and profit data across multiple product lines, enabling drill-down analysis by region, category, and time period.
- Identified 3 underperforming sales segments through trend analysis, supporting data-driven resource reallocation strategies that improved quarterly revenue targeting efficiency by ~15%.
- Presented actionable business insights to simulated stakeholders, receiving recognition for clarity, usability, and effectiveness of visualizations.

Predictive Modeling for Nonprofit Donor Targeting

SAS, Gradient Boosting, Random Forest

- Developed and evaluated multiple supervised learning models, including Gradient Boosting, Random Forest, Decision Trees, and Logistic Regression, to predict donor likelihood and projected donation amounts.
- Optimized model performance using holdout validation and threshold tuning to improve recall for high-value donor identification and reduce false negatives.
- Delivered a comprehensive analytical report comparing model performance and providing data-driven recommendations for nonprofit marketing and fundraising strategies.

Respiration Rate Detection from PPG Signals

Python, 1D-CNN, Tableau, Excel

- Processed physiological PPG time-series sensor data and developed a 1D-CNN model for respiratory rate prediction using 5-fold cross-validation to improve model generalization.
- Analyzed model performance metrics and visualized prediction errors using Tableau and Matplotlib, translating technical findings into accessible insights for non-technical audiences.
- Applied signal processing and deep learning techniques to support healthcare-focused predictive analytics applications.

EDUCATION

Master's in Advanced Data Analytics, University Of North Texas

GPA: 3.88

B.Tech in Computer Science and Engineering, Indian Institute Of Information Technology Dharwad

2020-2024

CGPA - 7.5

Relevant Coursework: Dbms, OS, CN, and OOP.

ACHIEVEMENTS

- Front-End development Libraries - This certification has equipped me with a diverse array of tools essential for front-end website development, significantly expanding my proficiency in various libraries within the front-end domain.[\(certificate\)](#)
- Postman API Fundamentals Student Expert - [\(certificate\)](#)
